

Dental Care @ Home

Services & Fees

We offer convenient dental care in the comfort of your own home for our housebound patients. Whenever possible, we aim to complete all required treatments in a single visit to minimise the number of appointments and reduce overall costs for you.

Surcharge fee

There is an initial surcharge fee starting at **£170** per visit. The surcharge fee is partly determined by the distance from our practice to your home. The surcharge reflects the extra time and resources required to treat patients in a domiciliary setting.

Domiciliary surcharge	
up to 15-minute drive	£170
up to 30-minute drive	£255
up to 45-minute drive	£340
We strive to group patients by location to keep the surcharge at £170 per patient.	
In a care home setting: the fee will be as above + £110 for each additional patient. The total fee will then be split. e.g. if three patients are seen at a care home within 15 minutes' drive, the total cost will be £390. The cost per patient will therefore be £130 (£390÷3).	

Examination Packages

New Patient Examination package, which includes:	
- Comprehensive dental assessment	£99.60
- Scale & Polish	£98.20
- Fluoride varnish	£23.50

Additional services

Dentures

Dentures, also known as false teeth, are removable dental prostheses designed to replace missing teeth. They help restore essential functions like chewing and speaking, as well as improve overall appearance.

We offer three levels of dentures to suit your needs:

- **Economy:** Affordable private dentures, offering a practical solution for tooth replacement.
- **Standard:** A beautiful set of private dentures with aesthetic detailing, providing a more natural look.
- **Premium:** High-quality dentures with superior aesthetic detailing, ensuring an exceptional, lifelike appearance.

*Dentures start at **£705**, with the price increasing based on the material, number of teeth, and level of dentures required.

If a denture is recommended your Dentist will provide you with a full breakdown of costings for your consideration.
